LinkedIn · Upwork · Addis Ababa · Open to remote

01 PROFILE

Full-stack developer building SaaS products, e-commerce platforms and APIs with **Laravel, React and MySQL**, from database design and business logic to the integrations between services and the interface on top. Currently working across a **six-service commerce platform** at Barecare. **Top Rated on Upwork with 100% Job Success**. Looking for a full-time remote role.

02 SKILLS

BACKEND	PHP, Laravel, Livewire, Filament, REST APIs, Laravel Sanctum, queues & scheduled jobs, service SDKs
FRONTEND	React, Next.js, TypeScript, JavaScript, Alpine.js, Tailwind CSS, shadcn/ui, Material UI, Figma to code
DATA	MySQL, Redis / Valkey, schema design, query optimisation, performance tuning
DELIVERY	Docker, AWS, Vercel, Git, GitHub, GitLab, PHPUnit, Vitest, AI-assisted development

03 EXPERIENCE

Full-Stack Developer · Barecare (cosmetics e-commerce) · Remote

Oct 2025 – Present

- Build features across **six Laravel services** (storefront and admin, warehouse, B2B shop, influencer platform) and the shared SDKs that connect them; **240+ commits**.
- Built shop ↔ warehouse order synchronisation and **automatic discrepancy detection** that compares SKU quantities between services and flags mismatched orders before they ship.
- Cut database queries on a key admin listing **from 75 to 3 per page** by removing N+1 loading, taking its load time **from ~4 s to under 1 s**; rewrote storefront search from per-word correlated subqueries to a single locale-filtered query with exact barcode lookup.
- Built B2B order import from CSV/XLSX with warehouse stock checks, and the in-store order flow with barcode scanning and **MyPOS card-terminal** payments.
- Moved warehouse item statuses to a **state machine**; added coming-stock deliveries, priority and customs statuses, and short-expiry warnings.

React Developer · VooGlue (DAG) · Remote

Feb 2025 – May 2026

- React development for DAG, a crypto presale platform for asset-backed art collectables, including its presale sales dashboard.

Freelance Developer · Upwork · Remote

Sep 2023 – Present

- **Top Rated, 100% Job Success, 5.0 across 11 completed jobs**, with repeat clients: Figma-to-code builds, page builders, dashboards and AI-driven UI prototypes.
- Designed and built the export website for **Winna Trading PLC**, a green-coffee exporter (React, TypeScript, Tailwind CSS).

Earlier: Front-End Developer Intern at Omishtu Joy Ag Tech Solutions (2024) and the Information Network Security Agency (2023).

04 SELECTED PROJECTS

Walk Out

Laravel 12 · Sanctum · MySQL · React 19 · Tailwind

Founder and full-stack developer of a productivity platform in development. Versioned REST API with **~85 models, 112 migrations and 101 test files**.

Affordly

React 19 · TypeScript · Recharts · Vitest

Local-first mortgage readiness analyser for irregular incomes, with stress testing and a tested TypeScript financial engine.

Upwork Income Analytics

Next.js · TypeScript · shadcn/ui · Recharts

Open-source dashboard turning Upwork exports into income and productivity insights, entirely in the browser.
